

BAGUS ILHAM SANTOSO

IT Infrastructure & Data Center Operations Specialist | Incident Management | Network & System Support
+62 85781010372 | ilhambagus477@gmail.com | bi-sans.github.io/my-portfolio/

OBJECTIVE

IT Infrastructure and Data Center Operations professional with more than 8 years of experience supporting enterprise IT environments, network infrastructure, system operations, and mission-critical data center services. Experienced in incident management, infrastructure monitoring, access control, remote hands services, environmental systems, and SLA-driven customer support. Proven ability to coordinate cross-functional teams, vendors, and customers during operational incidents and maintenance activities. Successfully led infrastructure and automation projects, including a Django-based operational application that reduced manual workload by 73%.

WORKING EXPERIENCE

PT NTT INDONESIA – Jakarta, Indonesia

MS Client Service Desk Agent – Data Center Engineer | *July 2023 – Present*

- Monitor and coordinate daily data center operations, including infrastructure alarms, incidents, environmental conditions, and customer service requests to maintain service availability and SLA compliance.
- Manage operational requests such as site access, remote hands, equipment movement, visual inspections, rack allocation, and other data center support activities.
- Perform initial diagnostics, provide first-level resolution, and escalate complex incidents to the appropriate facility, network, security, or resolver teams.
- Coordinate maintenance activities, critical incidents, and operational changes with internal teams, vendors, and customers to minimize risk and service disruption.
- Administer access documentation, security requirements, and audit-related records in accordance with data center policies and procedures.
- Prepare incident notifications, maintenance announcements, operational reports, and customer communications while contributing to process improvement and workflow automation.

PT INTIKOM BERLIAN MUSTIKA – Jakarta, Indonesia

IT System and Operations (Onsite: PT BCA & BCA Digital) | *April 2020 – November 2022*

- Delivered onsite enterprise IT support for hardware, software, operating systems, business applications, and network connectivity.
- Deployed, configured, and standardized Windows and macOS devices based on corporate security and operational requirements.
- Managed incidents and service requests through JIRA, including troubleshooting, resolution tracking, documentation, and reporting.
- Administered Active Directory user accounts, access permissions, group memberships, and Microsoft Azure licensing.
- Monitored and supported network infrastructure using FortiGate, FortiAP, Cisco AnyConnect, and other enterprise networking technologies.
- Maintained IT assets, server-room operations, and device lifecycle records while coordinating vendors, governance teams, SD-WAN implementation, and end-user device standardization.

PT ARHAPRO – Bogor, Indonesia

IT Support / IT Staff | *September 2017 – April 2020*

- Provided technical support and troubleshooting for desktops, laptops, software, operating systems, printers, and network connectivity.
- Installed, configured, and maintained IT equipment, including access points, routers, switches, biometric devices, CCTV, and attendance systems.
- Monitored network and infrastructure availability using Zabbix and resolved performance or connectivity issues.
- Supported ERP applications and performed scheduled database backups to maintain system reliability and data availability.
- Managed IT assets, technical documentation, procurement activities, and coordination with external vendors.
- Led the company profile website project as Project PIC, covering requirements gathering, vendor selection, tender evaluation, implementation, and final delivery.

EDUCATION

- **Bina Nusantara University**
Bachelor's Degree in
Computer Science
GPA: 3.56 / 4.00
- **STMIK Bani Saleh**
Associate Degree in
Computer Engineering
GPA: 3.60 / 4.00

KEY PROJECTS

- **MailGenix System Development**
The Project Manager led requirements, UAT, implementation, and post-live improvements.
- **IP Phone System Deployment**
Supported vendor coordination, testing, and VoIP readiness.
- **SAN Implementation**
Led planning and deployment of a Synology-based storage solution.
- **SD-WAN & Device Standardization**
Supported network modernization and endpoint governance at BCA Digital.

CERTIFICATION & COURSES

- Fortinet Certified Fundamentals Valid until 2026
- Fortinet Certified Associate Valid until 2026
- MikroTik Certified Network Associate Certified in 2020
- ServiceNow IT Leadership — LinkedIn Learning
- Google Cloud Practitioner Essentials — Dicoding
- Google Cloud Engineer Fundamentals — Dicoding

SKILLS

HARD SKILLS

- **Systems:**
Linux, Windows Server
- **Networking:**
Fortigate, Cisco, Mikrotik, Unifi, Ruijie and Aruba
- **Tools:**
ServiceNow, JIRA, Zabbix
- **Cloud:**
Microsoft Azure, Google Cloud Platform
- **Storage & Security:**
SAN (Synology), Firewall, Access Control Systems

SOFT SKILLS

- Problem Solving
- Communication
- Collaboration
- Decision Making
- Adaptability

LANGUAGE

- Indonesian – Native
- English – Full Professional Proficiency
